Print length : 24 pages

Gunderson takes everyday objects that we know and love, such as a banana, a pencil, and a car, and compares them to some of the biggest, smallest, tallest, and most extreme objects in the universe. For example, did you know that the sun is 109 times bigger than the Earth? Or that a blue whale is the size of 3 school buses? And that the Milky Way galaxy is so big that it would take light 100,000 years to travel across it?

These comparisons are not only fun to read, but they also help us to understand the vastness of the universe and our place in it. Gunderson's writing is clear and concise, and her visuals are stunning. The book is

perfect for children of all ages, and it is sure to inspire a lifelong love of learning.

### **Here are a few of the wacky comparisons that you'll find in the book:**

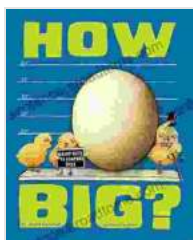

- The Earth is about the size of a marble compared to the sun.
- A blue whale is the size of 3 school buses.
- The Milky Way galaxy is so big that it would take light 100,000 years to travel across it.
- A grain of sand is about the size of a bacteria compared to the Earth.
- The universe is about 13.8 billion years old, which is about 400 times older than the Earth.

These comparisons are just a taste of what you'll find in *How Big? Wacky Comparisons That Put the World into Perspective*. This book is a must-read for anyone who loves science, learning, and fun.
