In the digital age, the vast amount of data generated and stored has raised important questions about our abilities to remember and forget. We now have unprecedented access to information, but what are the consequences of this constant connectivity? How does it affect our privacy, our decision-making, and our collective memory?

Remembering and Forgetting in the Digital Age explores the legal, governance, and technological challenges posed by the digital age. It brings together leading scholars and practitioners to examine how new technologies are changing the way we remember and forget, and how these changes are affecting our society.

Key Issues

- **Data Privacy:** How can we protect our personal data in an age where it is constantly being collected and shared?

- **Surveillance:** How do we balance the need for security with the right to privacy?

- **Internet Regulation:** How can we regulate the internet to ensure that it is a safe and open space for all?

- **Social Media:** How are social media platforms shaping our perceptions of reality and our collective memory?

- **Big Data:** How do we use big data to improve our lives without compromising our privacy?
